**Abstract:**

EP 958805 A2

NOVELTY Make-up composition with good feeling on use comprising powder of composite silicone particles comprising a core of cured silicone rubber and a coating of a polyorganosilsesquioxane.

DETAILED DESCRIPTION A make-up cosmetic comprises a uniform blend of:

(a) 0.01-30 wt.% powder of composite silicone particles comprising a core of cured silicone rubber and a coating of a polyorganosilsesquioxane;

(b) a non silicone powder; and

(c) an oiling agent.

USE Make-up cosmetic composition, e.g. face powders, foundations, cheek rouges, eye shadows, lipsticks, eyeliners, mascaras, eyebrow pencils and manicures.

A cheek rouge composition comprised (parts by weight):

(a) titanium (3);

(b) mica flakes (11);

(c) pigments (1);

(d) composite powder as claimed (10);

(e) non-porous spherical silica particles (20);

- (f) ceresin (4);
- (g) candelilla wax (1);
- (h) squalane (35);
- (i) dimethylpolysiloxane;
- (j) antiseptic agent (q.s.); and
- (k) perfume (q.s.).

The composition was evaluated as being smooth and dry in feeling and having good spreadability on the skin and good cosmetic finish.

ADVANTAGE The composition has good spreadability and excellent feeling in use (e.g. non-sticky and refreshing).

pp; 10 DwgNo 0/0

**Technology Focus:**

TECHNOLOGY FOCUS - POLYMERS - Preferred Composition: The composition comprises 0.05-10 wt.% (a). The silicone particles are spherical and have an average diameter of 0.1-100 microm. The coating layer makes up 1-20 wt.% of the silicone particles.

The polyorganosilsesquioxane is a polymethylsilsesquioxane. Alternatively, it is the product of a hydrolysis-condensation reaction of an organotrialkoxy silane in aqueous medium in the presence of the core particles of silicone rubber. The cured silicone rubber is the product of hydrosilation between a vinyl-organopolysiloxane and an organohydrogenpolysiloxane, mixed together in the form of an oil-in-water emulsion.

JP 2000038321	A		8	A61K-007/06	

**Abstract:**  
 EP 958804 A2

NOVELTY Hair care treatment composition comprises a uniform blend of:

- (1) 0.01-50 wt.% composite silicone particles (A), each comprising a core of cured silicone rubber (A1) and a cladding layer of a polyorganosilsesquioxane resin (A2); and
- (2) base ingredients (to 100 wt.%).

USE Used in various hair care compositions e.g. sprays, rinses or rinse-in shampoos.

ADVANTAGE The compositions impart excellent smoothness and gloss to hair but do not cause stickiness or heaviness.

pp; 10 DwgNo 0/0

**Technology Focus:**

TECHNOLOGY FOCUS - POLYMERS - Preferred Composition: The composition contains 0.05-10 wt.% component (1). Component (A2) is a polymethylsilsequioxane. Particles (A) have a spherical configuration, the particles having an average particle diameter of 0.1-100 microns. The cladding layer forms 1-20 wt.% of the composite particles. (A1) is a product of a hydrosilation reaction between a vinyl-group containing organo-polysiloxane and an organohydrogenpolysiloxane mixed together in the form of an oil-in-water emulsion in an aqueous medium. (A2) is a hydrolysis-condensation product of an organo-trialkoxo silane in an aqueous medium in the presence of particles of (A1). The organo-trialkoxo silane is methyl trimethoxy silane.

Abstract (Basic): \*WO 200197773\* A1

NOVELTY - A solid water in oil emulsion for make-up and skin and  
body treatments, comprises an oily phase stabilized by a polyamide with  
pendant and terminal fatty acid chains.

DETAILED DESCRIPTION - A solid emulsion containing dispersed one within the other an aqueous phase and a liquid fatty phase structured by one or more polymers of average mol.wt. 1000- 30000 comprising a polymeric backbone with repeated units with at least one heteroatom and pendant and terminal optionally functionalized 12-120C fatty chains bonded to them. The liquid fatty phase and polymer form a physiologically acceptable medium.

USE - The solid emulsion composition is used for application to the skin in care, makeup or treatment procedures (claimed).

ADVANTAGE - The product has a better feel and is less greasy than wax stabilized compositions. It applies more evenly and has less tendency to sink into creases or wrinkles giving an uneven effect.

NOVELTY - Composition comprising a fluorinated oil thickened with a polymer is new. The polymer has a molecular weight of 1,000,000 or less and comprises a skeleton of heteroatom-containing hydrocarbon repeat units and optionally pendant and/or 6-120C terminal fatty groups.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for a lipstick composition comprising a fluorinated oil thickened with a non-waxy polymer giving the composition the appearance of an elastic deformable solid with a hardness of 30-300 gf in the absence of wax.

USE - The composition is useful as a cosmetic product for the care, make-up or treatment of human keratinic materials, especially in stick form, especially as a mascara, eye liner, foundation, lipstick, blusher, deodorant, make-up remover, body make-up, eye shadow, concealer, shampoo, after-shampoo, sunscreen, face or body care product or nail varnish.

ADVANTAGE - The composition has good storage ability and forms films that are glossy, supple, comfortable, non-sticky and homogeneous.

Abstract (Basic): \*WO 200247622\* A2

NOVELTY - A composition, comprises wax-in-water emulsion and a polyamide polymer with an amide unit and fatty acid chains.

DETAILED DESCRIPTION - A composition (C) comprising, in a physiologically acceptable medium, a wax-in-water emulsion and at least one first polyamide polymer of weight average molecular weight less than 100,000 comprising a polymeric skeleton having repeating hydrocarbon units containing at least one amide unit and at least one 8-12 C pendant fatty chain and/or optionally functionalized terminal fatty chain, which is bonded to the amide units.

INDEPENDENT CLAIMS are also included for:

- (i) a mascara comprising composition (C);
- (ii) a cosmetic process for making-up or caring for human keratin products using composition (C); and
- (iii) using composition (C) to deposit an adhesive product on keratin materials and/or to obtain a rapid make-up of keratin.

USE - The composition is used in cosmetic hair products such as mascara eyeliner and eyelashes.

ADVANTAGE - Rapid, efficient and long-lasting application to hairs especially eye lashes.
